Early Alert System Current Implementation LMS Grades as a Signal

Re-design

## Early Alert System

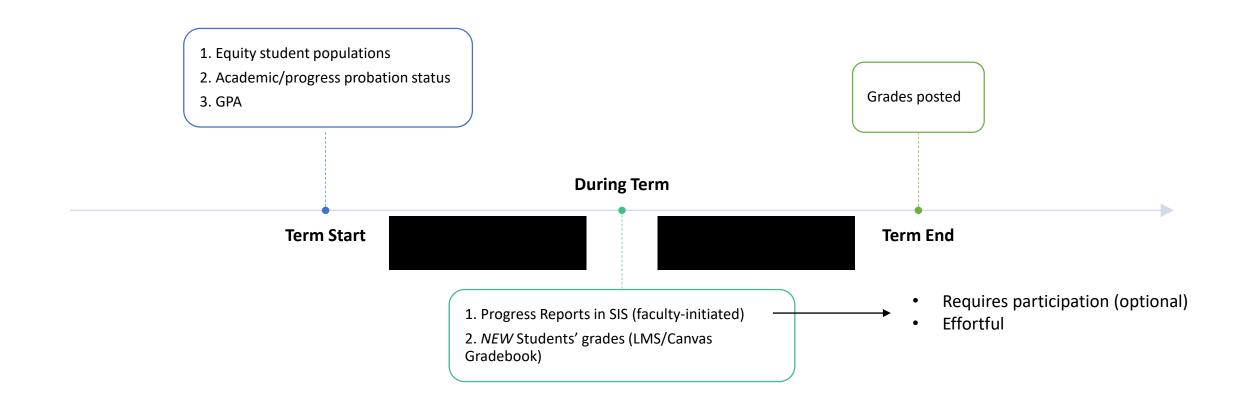

SIGNAL: STUDENTS ARE AT RISK OF NON-SUCCESS

COORDINATED INTERVENTION(S)

<u>Article</u>: 3 reasons why your early-alert program is falling short (from EAB)

**Article**: Early-Alert Systems Seen as Mixed Bag

# Signals

# Current Implementation

## Early Alerts at IVC: Progress Reports

Progress Reports: module within Student Info Sys

Implemented in Spring 2016

#### Intent

- Inform students of progress so they could <u>continue</u> / <u>alter</u> student behaviors (positive / negative)
- Inform counselors and student services staff of feedback from instructors

## Early Alerts Process (Progress Reports)

Students in class: exhibit positive and negative behaviors

Instructor: logs into student information system, and logs PR

Feedbacks recorded / sent to students, with recommendations

*Nudge* is intervention

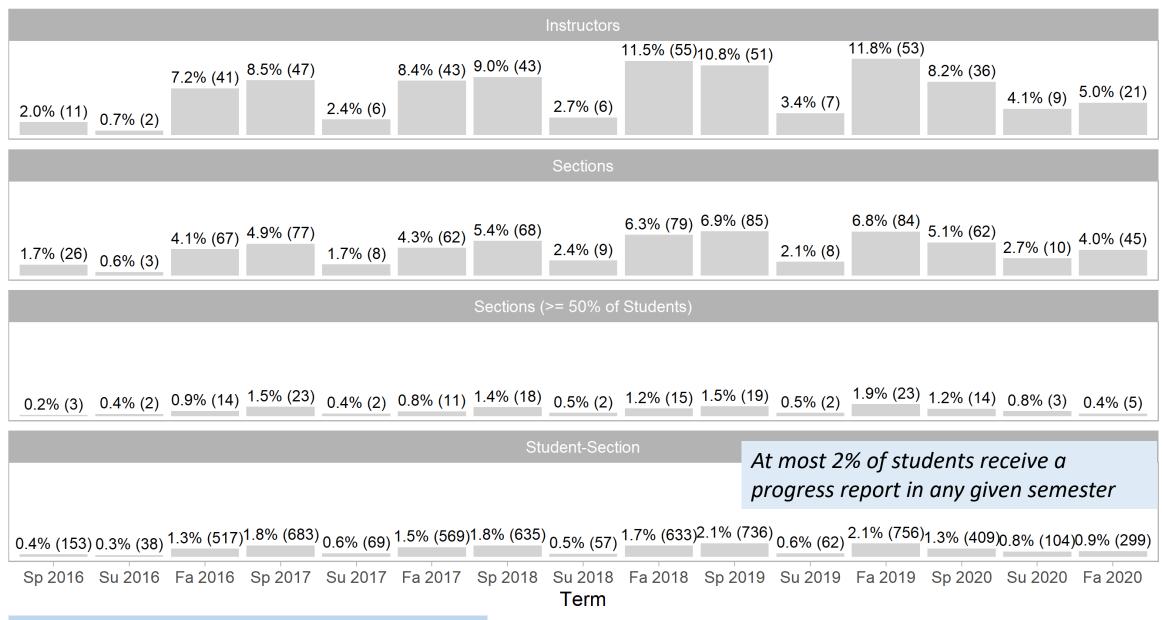

Feedbacks logged; visible by students, instructors, counselors

What happens next?

### Feedback Given

InstructorFeedbackTypeName	InstructorFeedbackDesc	InstructorRecommendedActionDescription	N
Negative	Absences	Contact Instructor - Absences	1,526
Negative	Absences	No Action Required - Tracking Only (no nudge sent)	980
Negative	Absences	Other - Customized Message	831
Negative	Low Test/Quiz Scores	Contact Instructor - Low Test/Quiz Scores	338
Negative	Low Test/Quiz Scores	No Action Required - Tracking Only (no nudge sent)	661
Negative	Low Test/Quiz Scores	Other - Customized Message	256
Negative	Missing Assignments	Contact Instructor - Missing Assignments	1,000
Negative	Missing Assignments	No Action Required - Tracking Only (no nudge sent)	963
Negative	Missing Assignments	Other - Customized Message	455
Negative	Tardiness	Contact Instructor - Tardiness	79
Negative	Tardiness	No Action Required - Tracking Only (no nudge sent)	134
Negative	Tardiness	Other - Customized Message	15
Positive	100% completion of assignments	Great Job - 100% completion of assignments	1,186
Positive	100% completion of assignments	No Action Required - Tracking Only (no nudge sent)	3
Positive	100% completion of assignments	Other - Customized Message	50
Positive	Good attendance	Great Job - Good Attendance	1,619
Positive	Good attendance	No Action Required - Tracking Only (no nudge sent)	5
Positive	Good attendance	Other - Customized Message	8
Positive	High Test/Quiz Scores	Great Job - High Test and Quiz Scores	979
Positive	High Test/Quiz Scores	No Action Required - Tracking Only (no nudge sent)	1
Positive	High Test/Quiz Scores	Other - Customized Message	4
Positive	Making good progress	Great Job - Making good progress	2,392
Positive	Making good progress	No Action Required - Tracking Only (no nudge sent)	4
Positive	Making good progress	Other - Customized Message	34

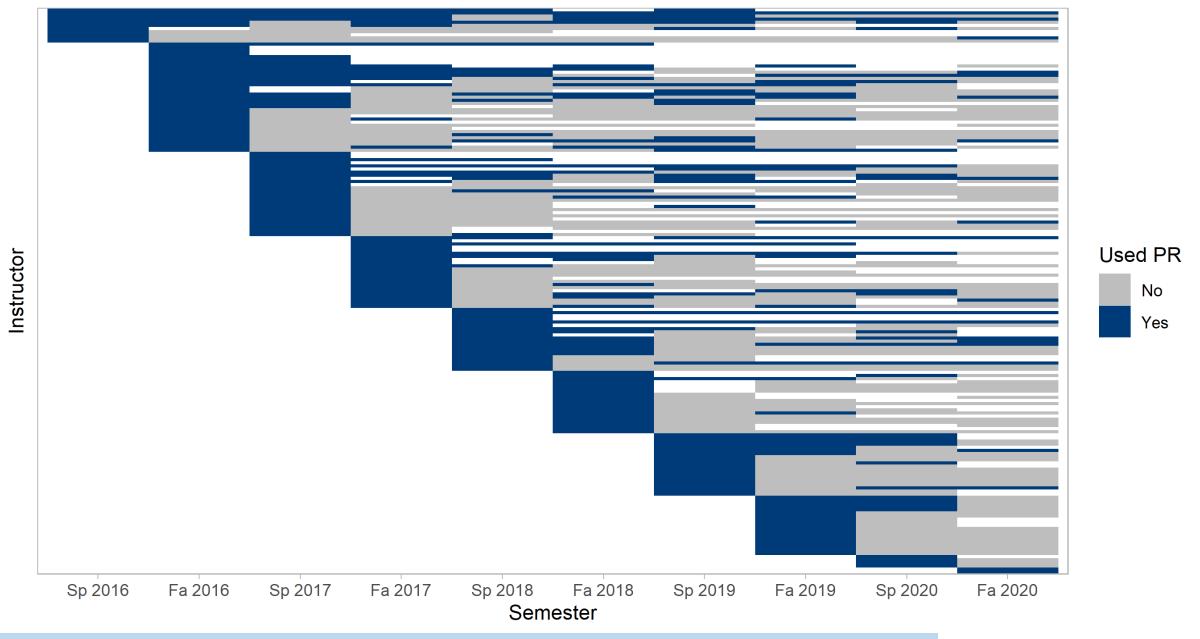

#### Utilization of Progress Reports

Progress Reports are underutilized.

# Utilization is low.

Instructors' Pattern of Usage of Progress Reports by Term

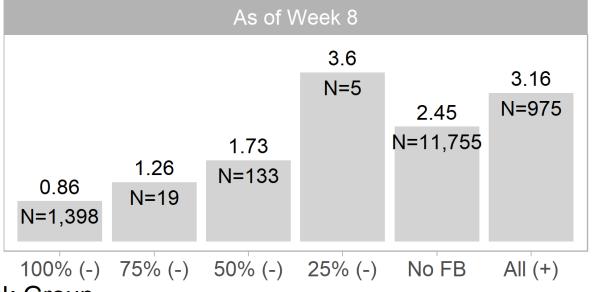

Very few instructors use Progress Reports consistently term over term.

# Most instructors stop usage.

# Effective?

#### Grade Points and Feedback (FB)

Among sections (Spring 2016 - Summer 2019) that used Progress Reports (>1)

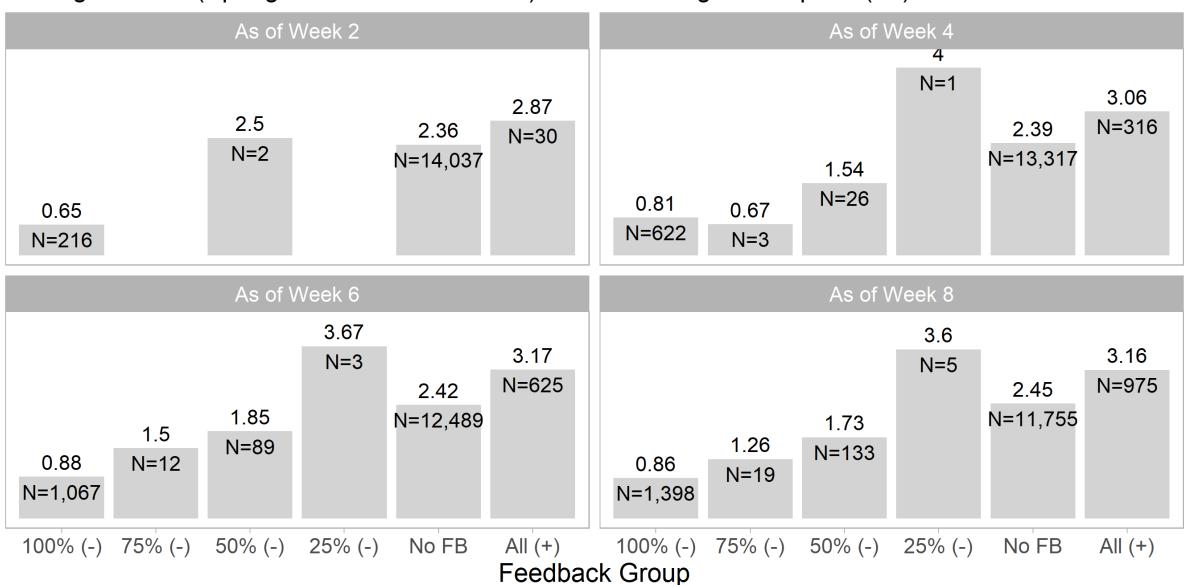

Feedback Group

Negative feedback provides a <u>strong</u> non-success signal.

#### Grade Points and Feedback (FB)

Among sections (Spring 2016 - Summer 2019) that used Progress Reports (>1)

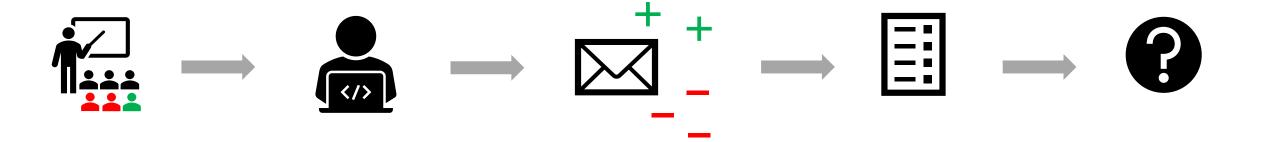

Negative feedback provides a strong non-success signal.

Nudges are <u>not</u> intervention.

Negative feedbacks are a strong *signal*.

## 1. Can we simplify Early Alerts?

2. What can we do to support students?

## Canvas (LMS) Gradebook as a Signal

**Pros** 

Effortless on the instructors' part (Progress Reports require extra effort)

Cons

Not all instructors use Canvas

Not all instructors use Canvas Gradebook

## Idea: Current Grade in Canvas

Old Signal: Progress Report	New Signal: Current Grade in Course	
Negative feedback logged by instructor	Grade < 70%	
Positive feedback logged by instructor	Grade >= 70%	

#### Signal / Model Assessment

- Rank order students based on risk
- Are more successes concentrated towards those labeled "low risk"?
- Are more non-successes concentrated towards those labeled "high risk"?

#### Metric: Gini Coefficient

- Compares how well a predictor segments outcome
- Gini: 0 1
- Gini = 0: model is not useful (equivalent to random labeling)
- Gini = 1: perfect model (all non-successful students are placed in the high risk group)
- Baseline Reference: GPA at start of semester

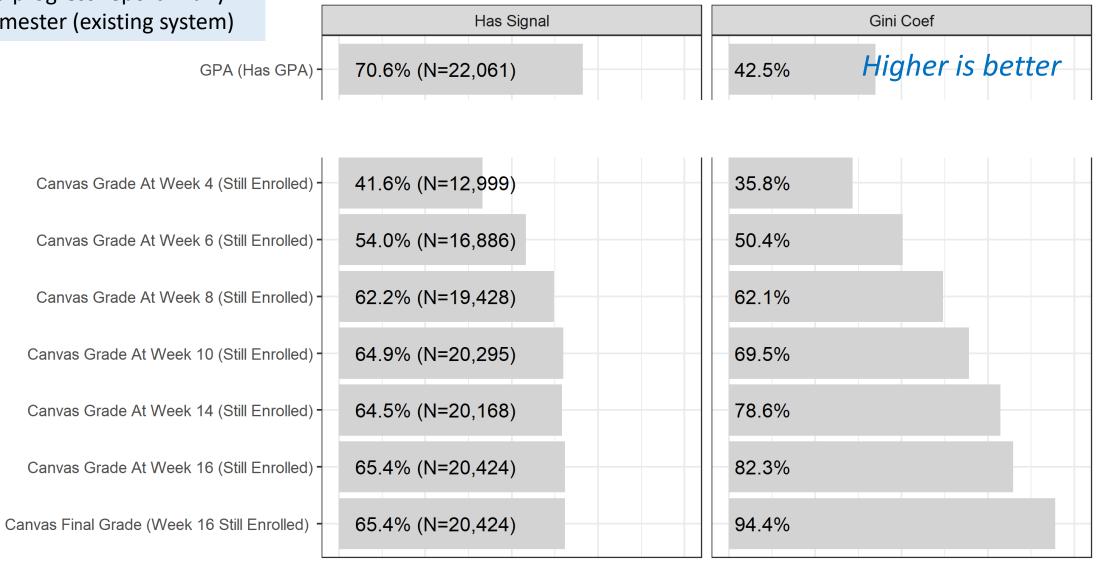

Risk Score (Ex:	Course
<b>Grade at Week X)</b>	Success

95%	0
90%	1
•••	•••
10%	1
5%	0

Recall: At most 2% of students receive a progress report in any given semester (existing system)

#### Signal Availability and Association with Success

Data: IVC Fall 2019 Credit Enrollments (Term Length >= 14 Weeks)

Signal from Canvas Gradebook is stronger than GPA starting in week 6...

Retrospective Look: Fall 2019 Student Lists

Idea: Use Grade < 70% As Early Alert

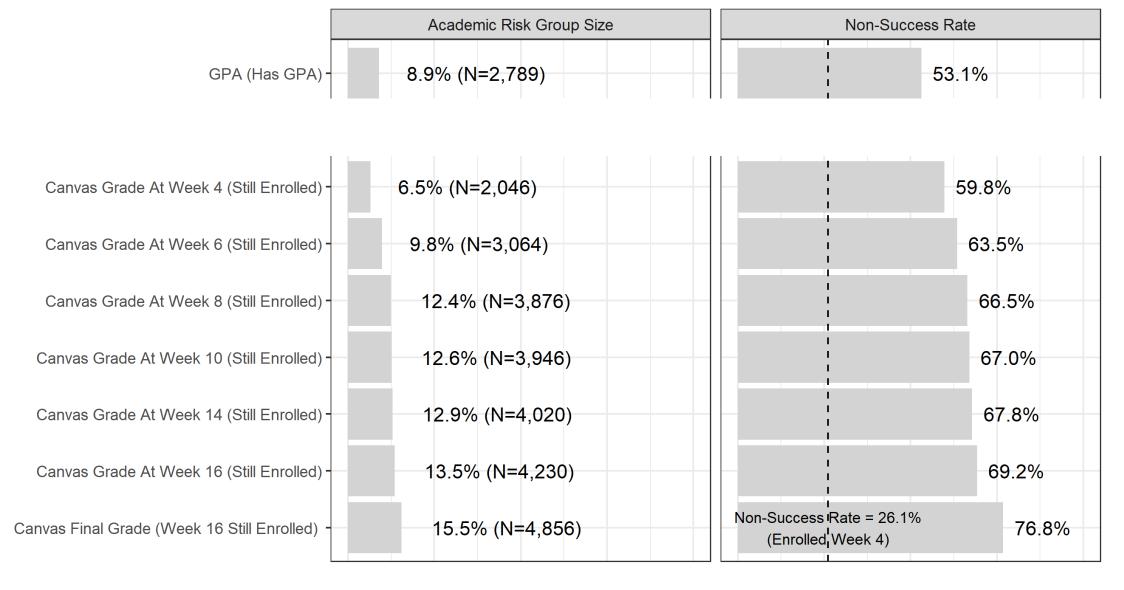

How many students are at academic risk?

At different time point in semester?

What is the actual non-success rate?

#### Apply Cutoff: GPA <= 2.0 or Score in Canvas <= 70%

Data: IVC Fall 2019 Credit Enrollments (Term Length >= 14 Weeks)

Week 8: 7 out of 10 students with Canvas grade <= 70% will not succeed.

## Call to Action: Instructional Faculty

#### How much time does a student spend in the classroom each semester?

One	Three
Course:	Courses:

Activity	<b>Hours spent</b>	<b>Hours Spent</b>
Admissions and Records	2	2
Financial Aid	2	2
Counseling/Advising	2	2
Tutoring	4	8
Student clubs and activities	8	8
Classroom	48	144
Total	66	166

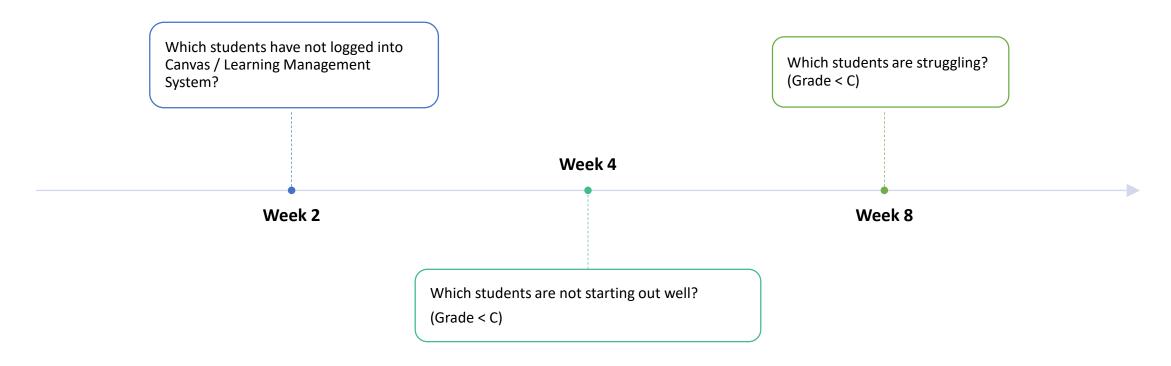

~73% of time spent in the classroom

~87% of time spent in the classroom

## Proposal: Early Alerts Re-design

- Instructional faculty involvement: fall 2020 (delayed due to Covid-19)
- Student services / completion teams: pilot in spring 2021

## Thank You

Please use the WHOVA Mobile App to rate this session. CAIR uses the session evaluations to determine the winners of the Best New Presenter, and Best Presenter awards each year
